MCXmatter

2. materials *Ecopanel Décor and AcouSoft from Feltech Manufacturing.*

composition Thermo-bonded PEI.
standout Choose solids, geometrics, faux wood grains, or stone effects for these impact-resistant acoustical panels, suitable for multi-use or walls.

3. material *Alpilignum from Alpi.*

composition Reconstituted wood.
standout Forest Stewardship Council-certified logs are rotary-skinned to yield thin layers for bonding into fully customizable blocks, minimizing waste and labor.

4. process *GB Mesh from GB Light.*

composition Glass and polymers.
standout Tiny beads are laminated between mesh and a solid backing to form retro-reflective textiles that can be customized with colors, patterns, or graphics.

5. material *Graffiti Shield.*

composition PET.
standout Self-adhesive film simulates metallic, mirrored, or glass finishes while remaining impervious to defacement, even acid-based etching techniques.

6. materials *Grit Curve and Grit Line by Naturtex.*

composition Wool felt and waxed cotton.
standout Circles or squares, woven or stitched from shoeleaves and backed with felt, combine to create floor coverings that resist both heavy abrasion and fire.
