# WALLS & CEILINGS

Structural and decorative options for interior surfaces

BY OLIVIA CHEUNG, MARCH

## ACOUSTIC CEILINGS

**1 Linear System** Consisting of felted, thermoformed polyester, Hunter Douglas's HeartFelt linear panels easily clip onto ceiling carriers. The system is sold in five shades of grey that can be combined to create patterns and gradients. [hunterdouglasarchitectural.com](http://hunterdouglasarchitectural.com)

**2 Affordable Finish** Atmosphaera Standard, Arktura's latest ceiling system, is cost-effective, scalable and easy to install. In linear, organic and faceted designs such as Drift, shown, the product is also sold in a variety of colours and materials. It is designed to merge easily with new and existing building systems. [arktura.com](http://arktura.com)

**3 Computative Surface** Parti by Ceilings Plus includes a group of ceiling products that are based on parametric design and algorithmic modelling and result from research-based collaborations with architects and contractors. Custom 2-D and 3-D surfaces can be created to integrate pattern and lighting. [cpparti.com](http://cpparti.com)

## WOOD

**1 Fire Wood** The ancient Japanese technique of burning or pre-weathering wood is brought to life in Kebony Shou Sugi Ban by Delta Millworks. Offered in varying textures and tones, the charred wood is treated with a bio-based liquid to enhance durability and stability. The result is suitable for exterior cladding and interior panelling. [deltomillworks.com](http://deltomillworks.com)

**2 Natural Designers** Alpi's 2017 Designer Collection of veneers includes interpretations - from three top designers - of graphic patterns found in nature. Piero Lissoni's contributions (shown) are characteristically minimal, while the Campana Brothers focus on transforming raw material, and Kengo Kuma draws from architecture to heighten organic patterns. **3 Triangular Turn** Plyboo's customizable Fractal architectural panels are based on the isosceles triangle. The 61-by-61-by-86-centimetre bamboo modules are offered in a range of colours and patterns, and can be left raw or treated in a range of natural oil finishes.
